## Listen to the Waves

Not the sound of your engine!

Enjoy perfect lighting, air conditioning, and music over dinner with our clean, quiet, full electric or hybrid energy power packages!

Having developed full electric and hybrid energy propulsion systems and the first 180 HP electric outboard, at AE&M Engineering we understand balancing power and performance!

### Our custom integrated solutions include:

- Full energy management system for the boat
- Battery power train
- High efficiency DC generators
- Any auxiliary the project may require.

### Did we mention the reliability?

Lithium batteries used in our systems have a guaranteed lifespan of 8 years and our electric motors are completely free of maintenance. Imagine, lower maintenance-costs but all the power of a conventional system!

It's time to get *Searious* about your power!
